Tomato	Yellow Brandywine OG	78: IND; Large 16-24 oz yellow slicer; excellent flavor; creamy texture

Potato	Adirondack Red OG	Dark purple skin and flesh with deep eyes. High yields of large, oblong tubers with consistent, blue-violet flesh. Holds color when cooked. High in antioxidants.
Potato	All Blue OG	Deep blue skin and blue centered flesh with a white ring. tubers are oblong with deep eyes. Moderate resistance to late blight, hollow heart, second growth, and common scab. Very drought tolerant
Potato	Caribou Russet OG	Best classic baked potato flavor. Moderate yields of very attractive, oval-to-oblong, russeted tubers that store well. Resistant to golden nematode race Ro1; moderately resistant to common scab and Verticillium wilt.
Potato	Chieftain OG	Early-to-midseason red-skinned variety offers high yields and good eating qualities. Expect a large set of round, bright red tubers with nice white flesh. Stores well. Resistant to scab and tuber net necrosis; field resistant to late blight.
Potato	German Butterball OG	Heirloom German Butterball potatoes have slightly flaky, but never dry, butter-yellow flesh and golden, netted smooth skin. Medium oval shaped tubers with excellent disease resistance.
Potato	Magic Molly OG	Purple through and through, from its skin to its flesh, Magic Molly retains its rich color when boiled. Its large tubers have an excellent earthy flavor,

		especially when roasted. Can be dug as new potatoes for smaller fingerlings.
Potato	Red Thumb (Sustainable)	Dug as small "babies," these bright red-skinned thumbs of delicacy have beautiful dark pink flesh. Pleasing flavor and firm flesh from a very productive small- to medium-sized plant.
Potato	Strawberry Paw (aka NY 136) OG	Vibrant red skin with creamy white flesh. High yields of large, round-to-oblong tubers with midseason maturity. Strawberry Paw's flesh has a smooth texture with excellent flavor. Great storage potential. Resistant to tuber late blight; moderate resistance to common scab.
Potato	Superior OG	Early maturing, moderately-high yields, and minimal skinning. Round to oblong tubers with buff, slightly flaky skin and white flesh are suitable for many uses. Good resistance to internal defects and common scab.
Potato	Yukon Gold OG	Longtime favorite for flavor. Large, upright plants produce round-oval tubers with smooth, thin skin and delicious, light yellow flesh. Resistant to Potato Virus A; moderately resistant to leaf roll. Susceptible to hollow heart, which can be avoided with consistent soil moisture
